## Representing Functions with Tables and Graphs

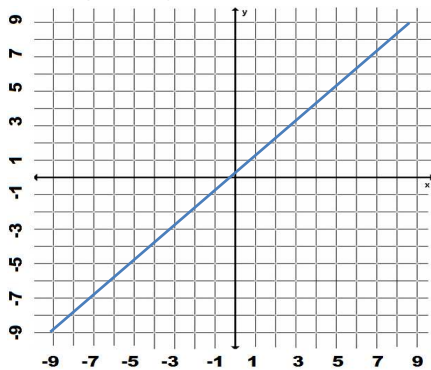

1. Are these equations functions?

equation	function?
$y = 6$	
$y = 6 + x$	
$2y = 2x + 6$	

2. Determine the Range

Function	Domain	Range
$y = 3x + 5$	0, 1, 6, 7	
$y = 6 - x$	-2, -1, 0, 1	
$y = 2x - 15$	5, 10, 15, 20	
$y = 6x - 20$	1, 2, 3, 4	

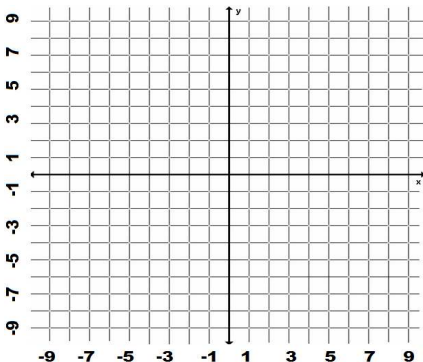

3. Challenge: Can you write the function that is graphed below?

4. Create an input-output table for this function:  $y = 2x + 4$ . Use a domain of -3, -1, 1, 3

x	y

5. Create a graph for your Input-Output table from Question #4. (Hint: if it's not a straight line, you made a mistake). What is the range of the function?

Range:	
--------	--
