Solving Two-Step Equations

Name _____

Date _____

1. Solve these equations for x

equation	solution
$2x + 6 = 12$	
$12x - 12 = 14$	
$8 - 2x = 24$	
$6x - 2x + 5 = 21$	

equation	solution
$5 - x = -14$	
$4 + 6x - 5 = 5$	
$22 - 4x = 66$	
$3x + 12 = 24$	

2. Find x

equation	solution
$28 = 2x + 10$	

5 Perimeter = 28

x

3. Your father is 10" less than twice your brother's height. Dad is 72" tall. How tall is your brother?

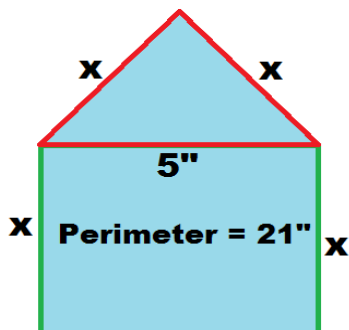

equation	solution

4. A number times 6 is 4 more than 32. What is the number?

equation	solution

5. Find x

equation	solution

6. Twenty-two minus a number is thirty-four

equation	solution
