# Closed Book; 90 minutes to complete <br> CUCC; You may use a calculator. 

1. 

| Equation 1 | Equation 2 | Find an ordered <br> pair that solves <br> this pair of |
| :---: | :---: | :---: |
| $4 x+5 y=33$ | $y=x+3$ |  |

2. You have 11 coins, and all are either nickles or pennies. You have a total of 27 cents. How many of each coin do you have?

| nickles | pennies |
| :---: | :---: |
|  |  |

3. Graph these two equations to solve for $x: y=x+6 ; y=-x+2$

4. A test has twenty questions worth 100 points. The test consists of True/False questions worth 3 points each and multiple choice questions worth 11 points each. How many true - false questions are on the test?

5. Solve for $y: 2 x+y=2 z$

6. A farmer has 160 acres planted. $1 / 4$ is soy beans (s); he has twice as much soy bean planted as corn (c); and the rest is tomatoes ( $t$ ). How many acres of tomatoes does he have planted?
7. Find the slope:

8. Draw a line with a slope of 3, and another with a slope of -3. Make both lines go through point (1, 1).

9. The perimeter of the larger triangle is $150 \%$ of the perimeter of the smaller triangle. What is the value of $x$ ?

2x

10. Write the equation for the line below.

11. What is the slope and the $y$ intercept for the line that represents this equation: $9 x+3 y=15$

12. A taxi charges ( $T$ ) $\$ 4$ plus $\$ .50$ per mile. Create an equation to determine what the taxi charge would be for any miles traveled (m). Create a table showing what the cost would be for 1 mile, 3 miles, 5 miles, 7 miles and 9 miles. Graph the data in this table.

| $m$ | 1 | 3 | 5 | 7 | 9 |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |

13. You have dinner at Louie's and the total comes to $\$ 11.50$. You ordered lasagna and a salad. The salad cost $\$ 2.50$, and you left a tip of $15 \%$ of the bill. How much was the lasagna?
14. What are the dimensions of this rectangular prism in centimeters? (1" = 2.54 cm)

15. Your car's gas mileage is 34 miles per gallon. What is the gas mileage in kilometers per liter? (1 mile = 1.61 km; 1 gal $=3.785$ liters)

16. The slope of a straight line is 2 . The $y$ intercept of the line is 12 . What is the equation that the line represents?

17. These two points are on a straight line: $(0,6),(3,12)$. What equation is represented by the straight line?
18. Draw a line that represents this equation: $y=5+3 x$

19.

Write an equation for a line with a slope of 2 that goes through this point.

$\square$
20. Solve the se system of linear equations:

|  |  | Solution |  |
| :---: | :---: | :---: | :---: |
| Equation 1 | Equation 2 | $x$ | $y$ |
| $y=5 x+4$ | $y=2 x+3$ |  |  |

21. A burger and a smoothie costs $\$ 5$. You and your friends buy 3 burgers and 6 smoothies, and the bill comes to $\$ 21$, How much does a burger cost? How much does a smoothie cost?

| burger | smoothie |
| :--- | :--- |
|  |  |

22. Please convert the equation to a Function

| Equation | Function |
| :---: | :---: |
| $2 x+3 y=63$ |  |

23. 

You have $\$ 40$ to spend on your evening with a friend at the Carnival. You want to buy some ride tickets ( $y$ ) and also some food tickets $(x)$. The ride tickets are $\$ 4$ each. The food tickets are $\$ 6$ each. What is the domain and the range of the tickets you could purchase?

| Domain | Range |
| :--- | :--- |
|  |  |

24. Find the Domain and the Range of the function represented in this graph.

| Domain | Range |
| :--- | :--- |
|  |  |

25. Big State University studied the idea that the gas mileage ( $m$ ) of a vehicle decrease as the number of wheels (w) on the vehicle decreased. They came up with a function that they felt described the relationship: $m=96.75 \div \mathbf{w}$. Is there a discrete or a continuous domain?

26. Your teacher says that your tomatoe plant will grow 1.25 " taller each month. It is now 6' tall. Write a formula that will tell you how tall your plant is at any time in the future. Is there a continuous or a discrete domain?

| formula |  |
| :---: | :--- |
| Discrete or <br> Continuous? |  |

27. Does this table represent a linear function? $\square$

| $x$ | $y$ |
| :---: | :---: |
| 0 | 6 |
| 1 | 8 |
| 2 | 10 |
| 3 | 12 |
| 4 | 14 |
| 5 | 16 |

28. Angle 2 is $28^{\circ}$. How big is Angle 3?

29. What is the Sum of the Angles of this polygon?

30. These are similar triangles. Find $x$.

31. Find $x$

32. The area of a circle is 113.04 Sq In . What is the radius of the circle?

33. The larger square is made up of 16 smaller squares. What is the length of the sides of square "a"?

34. Find $x$

35. The hypotenuse of a triangle is $\sqrt{ } 20^{\prime}$, and the height is 4 '. What is the length of the base?

Based upon the data in this chart, answer these questions:

| Age of Students |
| :---: |
| 18 |
| 17 |
| 20 |
| 19 |
| 46 |
| 16 |
| 17 |
| 14 |
| 19 |

36. What is the mean?

37. What is the median?

38. What is the mode?

39. 

Why is there such large a variance in the measures of central tendency?
40. Please translate into a math expression: twice a number is larger than 12.
41. Translate this number line into math, with $x$ as the variable.

42. Convert 144 to an exponential expression

43. Convert $5^{3} * 3^{2}$ to a simple number $\square$
44. Simplify this expression: $\left(2 x^{2} y\right)\left(3 x y^{3}\right)$
